Allison,

We received the pre-construction notification for NWP 39 for the above referenced project on February 18, 2022.

Due to my excessive workload, I was unable to provide a written determination within 45 days of its submission.

In accordance with the current nationwide general permit regulations (Federal Register dated January 13, 2021, pages 2744 to 2877), if the Corps of Engineers district does not respond to a pre-construction notification within 45 days of receipt, then the applicant may proceed with the project as proposed.

That means that you must perform the work as proposed in your pre-construction notification. Any substantive changes to the project would require you to submit a new notification to this office.

If you have any questions, let me know.

Brian

Brian A. Orzel
Senior Regulatory Project Manager, Civil Engineer
NY District US Army Corps of Engineers
Regulatory Branch
26 Federal Plaza, Room 16-406
New York, New York 10278-0090

Please note in order to ensure our continuity of operations and improve the timeliness of permit application reviews, the New York District, U.S. Army Corps of Engineers is requiring that all new permit applications be submitted to the New York District electronically at CENAN-R-Permit-App@usace.army.mil. Until further notice, the New York District will no longer process any paper

permit applications.

Subject: [Non-DoD Source] 20006912A - Joint Application Submission

Good morning,

I am just reaching out to check on the status of this application (see attached email) for the Dewpoint North Project in Wawayanda, Orange County, New York. We originally submitted this application February 18, 2022 and did not receive a response within the 45 day review period. Can you tell us the status of the permit?

Respectfully,

Allison Robinson (she/her/hers)
